

TRUNK HUGGING HOT VINES

Trunk Hugging Hot Vines protect trees with a natural look. They look just like vines, but have hot tentacles every 9" that are positioned to contact an approaching animal. 20' - 30' will cover most trees (also used to create Hot Roots). Hot Vines are energized by off-the-shelf Electric fence chargers

Pricing

Qty. < 100' = \$12.50/ln.ft. • Qty. > 100' = \$ 10.00/ln.ft.

To Order

- email to : mick@totalhabitat.com
- Fax to: 913-422-4834
- or call 316-644-5848 .

Hot tentacles deliver the training message

The Vine trunk is insulated and is mounted to the tree with 1-1/2" galvanized staples. (available at your farm supply store)

The Vines can be cut and re-attached to the main trunk, (with black wire ties) to create realistic (looking) branches. Twist together "Hot" tentacles from the main to the branch to make the branch "Hot".

Attach the hook-up wire from the Electric Fence Charger (+ side) to the core wire (main feed wire) of the Hot Vine. (See Vine installation instructions for more information and tips)
